

## Project Manager Maintenance

Location: Switzerland

Industry: Industry / Pharmaceuticals / Chemicals

Employment: Permanent – Consultant in an industrial environment

### Your tasks

- Planning, coordination and implementation of projects in the field of maintenance and plant construction
- Independent management of maintenance and optimization projects in production plants
- Ensuring on-time and cost-efficient project execution
- Close cooperation with internal departments
- Active participation in conversions, installations and technical improvements (hand-on)
- On-site execution monitoring and coordination of suppliers and service providers
- Support in the further development of maintenance and repair processes

### Your profile

- Completed apprenticeship as a plant engineer EFZ, polymechanic EFZ or comparable
- Subsequent further training to become a dipl. Technician HF Mechanical Engineering or Bachelor's degree in Mechanical Engineering (FH/Uni) is an advantage
- Several years of experience in the implementation of technical projects, ideally in the field of maintenance or plant engineering
- Ideally experience in maintenance, plant engineering or production facilities
- Very high hands-on mentality with a strong focus on implementation and pragmatism
- Structured, independent and solution-oriented way of working
- Assertiveness and strong implementation skills
- Fluent in written and spoken German

### We offer

- Responsible role in quality-critical industrial projects
- Working in innovative and regulated environments
- Long-term perspective in a dynamic environment
- Flat hierarchies, short decision-making processes and significant room for initiative

We look forward to receiving your CV with a brief cover letter outlining your goals and expectations. Please send your application documents to: [contact@cape7.ch](mailto:contact@cape7.ch)
